

UNIPROCESSOR FEASIBILITY OF SPORADIC TASKS REMAINS coNP-COMPLETE UNDER BOUNDED UTILIZATION

Pontus Ekberg & Wang Yi

UPPSALA UNIVERSITY

RTSS, December 2015

THE GENERAL SETTING

Instances

Task set \mathcal{T} of sporadic (or synchronous periodic) tasks with constrained deadlines.

THE GENERAL SETTING

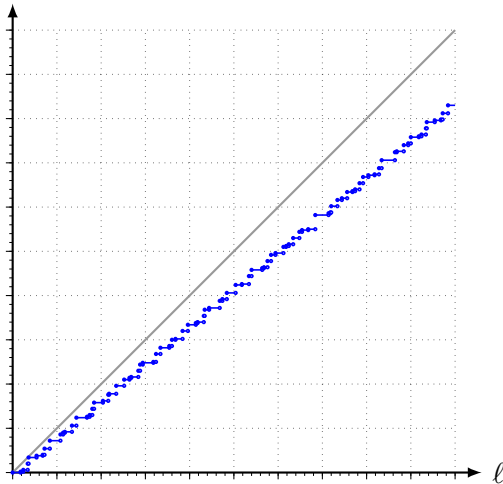

Instances

Task set T of sporadic (or synchronous periodic) tasks with constrained deadlines.

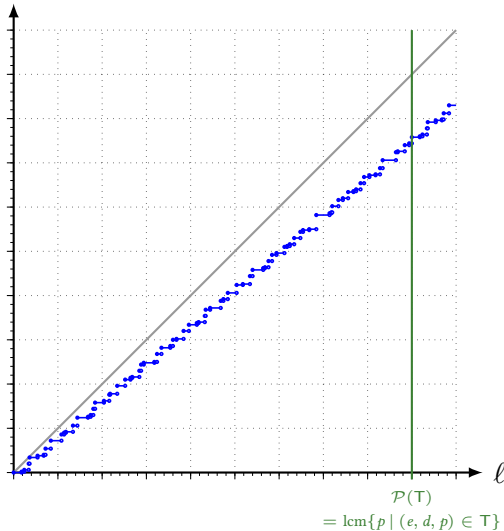

Question

Is T feasible on a preemptive uniprocessor?

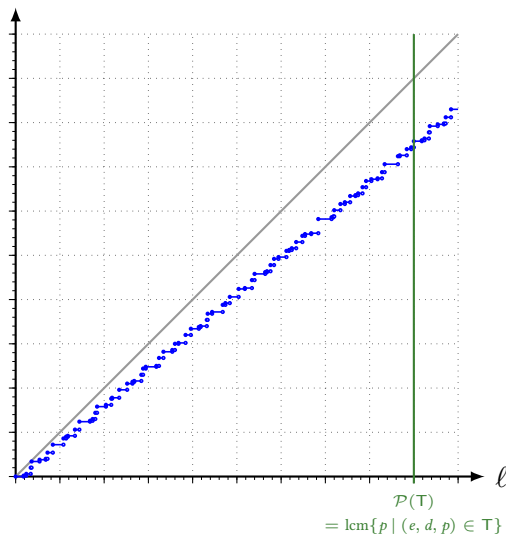

AN ALGORITHM FOR FEASIBILITY [BARUAH ET AL., 1990]

AN ALGORITHM FOR FEASIBILITY [BARUAH ET AL., 1990]

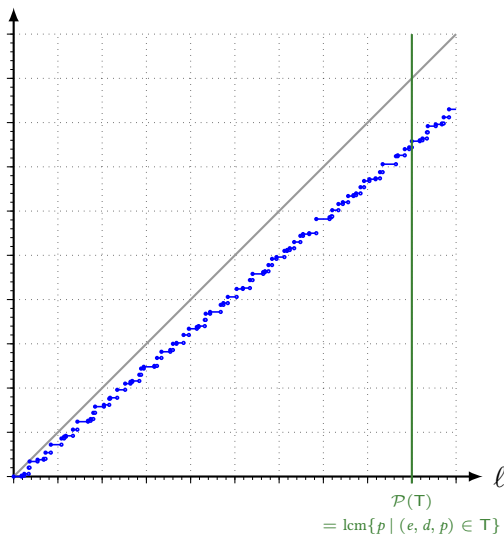

AN ALGORITHM FOR FEASIBILITY [BARUAH ET AL., 1990]

FEASIBILITY

- Exp. time algorithm exists

WHEN IS FEASIBILITY DECIDABLE IN POLY. TIME?

- 1 If deadlines are implicit. [Liu & Layland, 1973]
- 2 If deadlines are constrained and periods are harmonic. [Bonifaci et al., 2013]
- 3 If $U(T) \leq c < 1$ and $\frac{\max \text{ period}}{\min \text{ period}} \leq q(n)$.

WHEN IS FEASIBILITY DECIDABLE IN POLY. TIME?

- 1 If deadlines are implicit. [Liu & Layland, 1973]

- 3 If $U(T) \leq c < 1$ and $\frac{\max \text{ period}}{\min \text{ period}} \leq q(n)$.

WHEN IS FEASIBILITY DECIDABLE IN POLY. TIME?

- 1 If deadlines are implicit. [Liu & Layland, 1973]
- 2 If deadlines are constrained and periods are harmonic. [Bonifaci et al., 2013]
- 3 If $U(T) \leq c < 1$ and $\frac{\max \text{ period}}{\min \text{ period}} \leq q(n)$.

CONCLUSION

	General case	Utilization bounded by a constant c , $0 < c < 1$
Asynchronous periodic	Strongly coNP-complete	Strongly coNP-complete
Synchronous periodic (or sporadic)	Strongly coNP-complete	Weakly coNP-complete

\forall Thank you!
