

Texas A&M University, College Station

Fall 2013

MATH 308 512

Murtazo Nazarov

Total number of evaluations submitted: 5

Total number of students enrolled in class: 33

Percentage of students who submitted an evaluation: 15.2

Likely grade in this class:

C

Please comment about the instructor: What did (s)he do that you would want to remain the same?

What did (s)he do that you would change?

The teaching was very thoughtful and well explained

Please comment about the course: What would you keep the same? What would you change?

I would change the fact that quizzes were 40% of the grade, it would have been better for me if the grade came entirely from the three tests.

Do you recommend your instructor? Why or why not?

Yes, he is very fair.

Please comment on the book, help session and week-in review as it pertains to your course.

The book was ok, but the professor was much clearer.

Please comment on the use, if any, of technology (computers, graphing calculators, online homework system, etc.) in this course:

What would you keep the same? What would you change?

(No Response)

Please comment on whether or not your instructor fostered a learning environment that was respectful of all students.

Yes

Yes

Likely grade in this class:

B

Please comment about the instructor: What did (s)he do that you would want to remain the same?

What did (s)he do that you would change?

Everything he did was good. I loved how many example problems he did in class. They helped a lot in learning the material.

Please comment about the course: What would you keep the same? What would you change?

The course itself was fine. A decent amount of material, but not too much.

Do you recommend your instructor? Why or why not?

Yes, I do. He provides plenty of problems we can use to practice for the exams and quizzes, and there are no surprises on the quizzes and tests.

Please comment on the book, help session and week-in review as it pertains to your course.

The book wasn't that great. It was very good for the first half of the course, but for the second half, after we got to Lagrange multipliers, it wasn't helping too much. Not enough examples and coherent explanations. All of the practice problems were very good though.

Please comment on the use, if any, of technology (computers, graphing calculators, online homework system, etc.) in this course:

What would you keep the same? What would you change?

No technology really, which was fine.

Please comment on whether or not your instructor fostered a learning environment that was respectful of all students.

Yes. There was no issue of disrespect towards any students. Professor Nazarov is a good guy.

Yes. There was no issue of disrespect towards any students. Professor Nazarov is a good guy.

Likely grade in this class:

B

Please comment about the instructor: What did (s)he do that you would want to remain the same?

What did (s)he do that you would change?

He explained things well!

The only thing I would ask of him is to somehow position his body so that he wasn't blocking the board for relatively long stretches of time as he writes problems. I know it sounds funny, but there is an art to it I'm sure.

Please comment about the course: What would you keep the same? What would you change?

(No Response)

Do you recommend your instructor? Why or why not?

Yes.

Please comment on the book, help session and week-in review as it pertains to your course.

Book was good, it explained things well.

Please comment on the use, if any, of technology (computers, graphing calculators, online homework system, etc.) in this course:

Please comment about the instructor: What did (s)he do that you would want to remain the same?

What did (s)he do that you would change?

very available for office hours, explains material well

Please comment about the course: What would you keep the same? What would you change?

The course is fine the way it is

Do you recommend your instructor? Why or why not?

yes, he teaches the material well without making it unnecessarily difficult

Please comment on the book, help session and week-in review as it pertains to your course.

The book is alright, but it explains some material well and other material not very well at all.

Please comment on the use, if any, of technology (computers, graphing calculators, online homework system, etc.) in this course:

What would you keep the same? What would you change?

technology was not necessary for this class, so no change is needed

Please comment on whether or not your instructor fostered a learning environment that was respectful of all students.

he did
